

ABOUT BPA SOLUTIONS

BPA Solutions – Regulatory Compliance Simplified.

Since 2001, BPA Solutions is a leading global provider of innovative business software solutions based on Microsoft Office 365 and Share Point technologies. BPA develops ready-to-use regulatory software solutions - Quality, Risk, GDPR - to improve organization's processes, products, services and simplify regulatory compliance. BPA Solution Builder gives developers a wide range of integrated components to accelerate development and maximize user experience with SharePoint.

Built on Microsoft Office 365 & SharePoint Technologies

There are over 120M monthly active users (+40% growth rate quarterly, Oct 2017)

There are more than 400,000 organizations using SharePoint, 70% in the cloud (May 2018)

Software Solutions for Regulatory & Compliance

Regulatory Compliance Simplified.

It is challenging for organizations to comply with an increasing number of regulations (ISO, SOX, FDA, GDPR, COSO...) causing high fines and liabilities. Our solutions for global compliance let you develop a long-term and profitable business in a regulated world.

Ready-to-use Solutions for Global Compliance

BPA Quality & Risk Management is an all-in-one software solution to continuously improve processes, products, services and reduce inefficient and costly paper work. BPA GDPR Compliance is a preconfigured software solution which helps to improve data privacy compliance. Combining both apps, you get a complete solution for global compliance.
